# AI Recommender System - LIVE DEMO

LEARN TO BUILD AI RECOMMENDER SYSTEM FROM ZERO TO HERO WITH LIVE DEMO.

## LIVE ONLINE SESSION

ON 27-AUG-2022@ 7.00 - 08.30 PM IST (SATURDAY)  
@ 9.30 - 11.00 AM EST  
@ 2.30 - 04.00 PM LONDON

- Content Based Recommender System
- Collaborative Filtering based recommender system
- Matrix Factorization based Recommender System
- Live Demo

# AI RECOMMENDER SYSTEM - INTRO

---

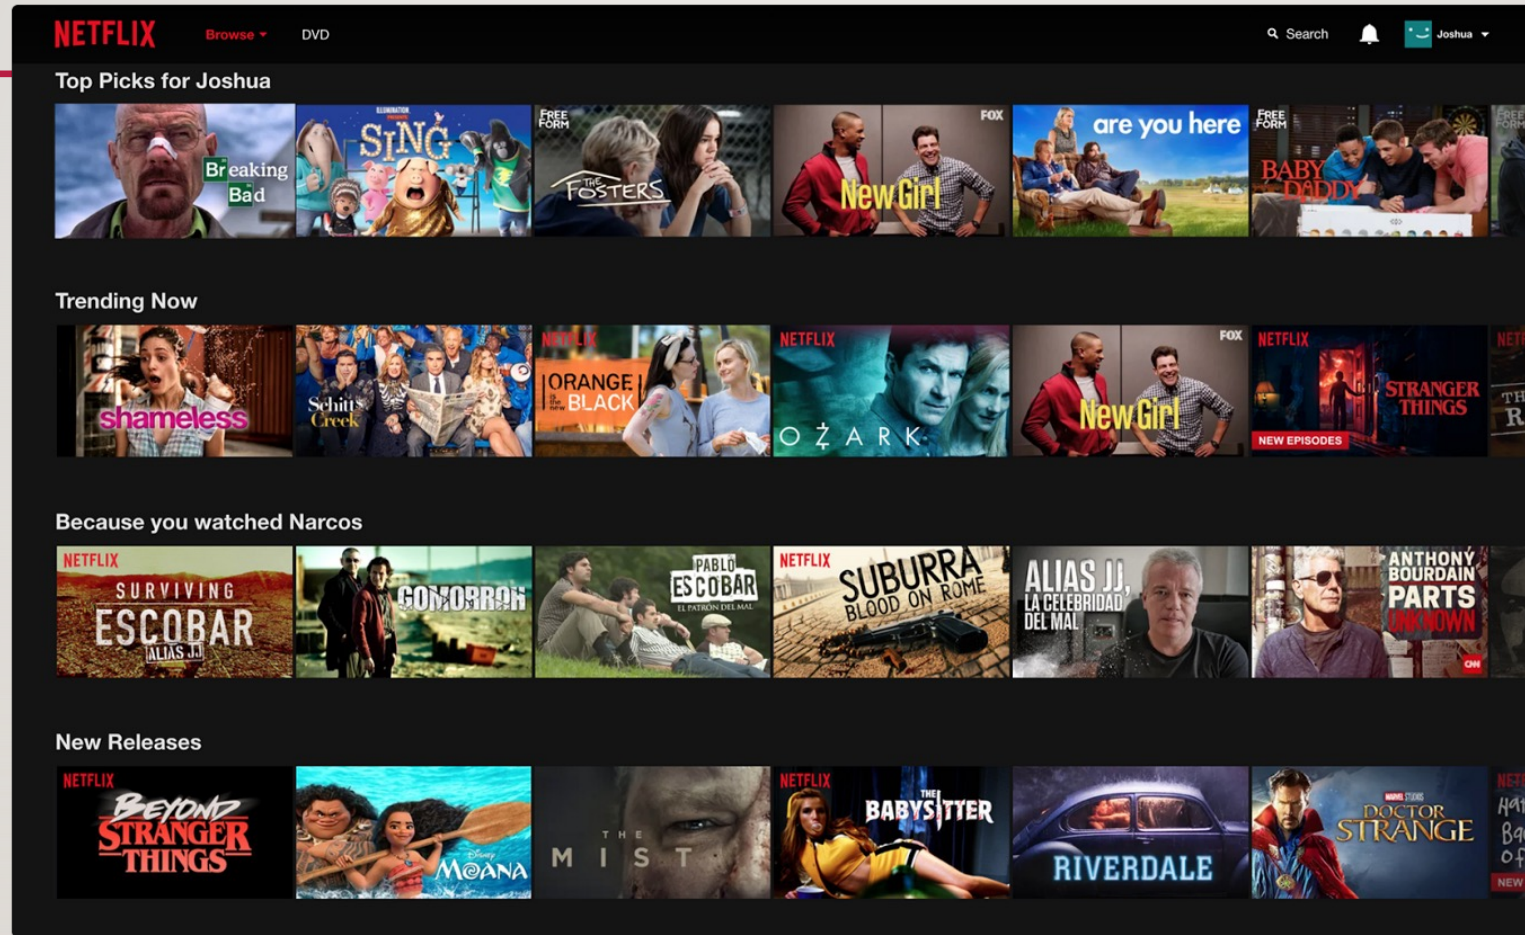

## THE PROBLEM

What the user  
sees

# MOVIE RECOMMENDATIONS

# ECOMMERCE PRODUCT RECOMMENDATION SYSTEM

# EVOLUTION OF RECOMMENDER SYSTEMS

---

# BASICS OF RECOMMENDATION SYSTEMS - EVENTS

---

- Events
  - Implicit Events
    - Online- Page view, click, app interactions
    - Commerce – cart, purchase, return
    - Media – review, watch, listen
  - Explicit Events
    - Ratings , review
  - Intents
    - Search query,
  - Social Events
    - Like, share, follow, unfollow, block

# BASICS OF RECOMMENDATION SYSTEM - CONTEXT

---

- Context
  - Devices accessed
  - Time
  - Location
  - Type of event
  - Reference
  - Type of interactions

# BASICS OF RECOMMENDATION SYSTEM - PREDICTION

---

- Given the **User, Event and Context** Predict the interest of the **recommend the top rangined outcome** to users.

# BASICS OF RECOMMENDATIONS

A CIA's mercenary team is ordered to assassinate the dictator of a South American island without knowing that their mission is viciously planned by a vindictive CIA officer, James Monroe.

Jake, who is paraplegic, replaces his twin on the Na'vi inhabited Pandora for a corporate mission. After the natives accept him as one of their own, he must decide where his loyalties lie.

American teenager Peter Parker, a poor sickly orphan, is bitten by a radioactive spider. As a result of the bite, he gains superhuman strength, speed, and agility, along with the ability to cling to walls, turning him into Spider-Man.

# CONTENT BASED RECOMMENDATIONS

---

A CIA's mercenary team is ordered to assassinate the dictator of a South American island without knowing that their mission is viciously planned by a vindictive CIA officer, James Monroe.

Adventure

Jake, who is paraplegic, replaces his twin on the Na'vi inhabited Pandora for a corporate mission. After the natives accept him as one of their own, he must decide where his loyalties lie.

Fantasy Science  
Fiction

American teenager Peter Parker, a poor sickly orphan, is bitten by a radioactive spider. As a result of the bite, he gains superhuman strength, speed, and agility, along with the ability to cling to walls, turning him into Spider-Man.

Kids and  
Adventure

# CONTENT BASED RECOMMENDATIONS – MOVIE RECOMENDATIONS

---

Get the data  
specific to Movies

Process the  
description of the  
Movies

Find similar  
movies and group  
them and rank  
them

Provide  
recommendation  
based on watching  
history

Movie Data set

Get Movie topic  
and process using  
NLP  
/BERT/Encoding

PCA for  
dimensionality  
reduction

Cosign Similarity  
Detection

# CODE DEMO -I – CONTENT BASED RECOMENDATIONS

---

- Github link for the content-based recommendations
- <https://github.com/prasannavj/AI-Recommender-System/>

# COLLABORATIVE FILTERING- BASED ON USER BEHAVIOUR PROVIDE THE RECOMMENDATIONS

# REPRESENT THE MOVIE DETAILS IN A MATRIX

?

?

# K-NEAREST NAIGHBOUR BASED COLLOBORATIVE FILTERING BASED RECOMMENDATION

- KNN ( K – Nearest Neighbour Algoritm)
  - Un Superwised classification algorithm
  - Build K classes from the data set
  - All the item on a class are considered related.

# CODE DEMO -2 – COLLABORATIVE FILTERING BASED RECOMMENDATIONS

---

- Github link for the content-based recommendations
- <https://github.com/prasannavj/AI-Recommender-System/>

# MATRIX FACTORIZATION - INTRODUCTION

---

1	2	3
5	10	15

Introduce  
Features

- Action
- Fantasy

# HOW TO FACTORIZE THE MOVIE MATRIX

Action	4	1	5	2
Fantasy	1	5	0	2

	Action	Fantasy
Malli	1	0
Shan	0	1
Gokul	1	0

4	1	5	2
1	5	0	2
4	1	5	2

# HOW DO WE IDENTIFY THE FACTORIZED MATRIX?

---

					
Action	4	1	5	2	?????
Fantasy	1	5	0	2	

	Action	Fantasy	
Malli	1	0	?????
Shan	0	1	
Gokul	1	0	

# APPROACH

Action	4	1	5	2
Fantasy	1	5	0	2

RESULT TO MATCH WITH THIS MATRIX

4	1	5	2
1	5	0	2
4	1	5	2

Action Fantasy

Malli	1	0
Shan	0	1
Gokul	1	0

- Initiate These matrix with random value.
- Calculate the Error with the expected matrix
- Correct the values of the Factorized matrix
- repeat the process

# DEMO -3 - MATRIX FACTORIZATION

---

Github link for the Matrix Factorization based  
recommendations

<https://github.com/prasannavj/AI-Recommender-System/>

# CONSTRAINTS OF RECOMMENDATION SYSTEMS

---

- Data Size and Dimensionality
- Extreme Sparsity
- Difficulty in model serving
- Wide variety of data and settings
  - Session, context, events, preferred data etc.
- Complex data structures – Video, Audio processing.
